

Thank you for your interest in carrying our products!

We have been supplying our popular yarns, patterns & kits to shops all over the globe for over 15 years!

We offer speedy shipping, excellent support on our yarns & patterns and knitted samples on loan for you to introduce our yarns to your customers.

About us... Lana Hames attended Stiches West for the first time in 1997 and it sparked her passion for natural fibers and knitting inspiring her to start her own business. It took 3 years of planning, designing and research and finally in 2000 Lanaknits Designs hemp for knitting was opened! Lana would run the raw fiber from the stalk through her spinning wheel then spend hours treating the hemp whacking it against a rock to 'tenderize' it to create soft yarn! Lana's designs of all of our popular patterns that celebrate our yarns!

Once the popularity of our yarns took off we visited and worked closely with our mills to create our popular hemp for knitting yarns! Our head office and design studio is located in downtown Nelson, BC. We have grown year after year as knitters and designers discover our great yarns! Our yarns and designs can be found in every major knitting and crochet publication!

About hemp yarns... Hemp has been used in fabric in Asia and Europe for over 5000 years! . But we think the fiber is at it's best as a yarn because it has outstanding drape, sheen & longevity. The fiber

comes from the inside of the long stalk. Because the fiber is so long it makes a very strong yarn that will not easily break or pill. Knitwear made with our 100% hemp yarns can be tossed in the washing machine & dryer and it will not stretch or shrink and becomes softer with each wash. Hemp is grown without the use of pesticides or herbicides, it repels 90% of UV rays and is a hypoallergenic fiber, great for kids and those with skin sensitivities!

I look forward to answering your questions, offering support & working together!

~ Lana Hames
